Career Highlights:

Motion Spectrum – Hybrid – Lahore, Pakistan

SYSTEM ADMINISTRATOR (JAN '25 – PRESENT)

Worked on real-world IT infrastructure. Administered Windows Server and Windows 10/11 environments, managed Active Directory and network services, deployed and optimized workstations, and implemented security, backup, and system performance solutions to ensure reliable and secure operations

Arch Technologies – Remote – Islamabad, Pakistan

MACHINE LEARNING ENGINEER INTERN (JUN '25 – SEP '25)

Worked on real-world ML. Applied YOLOv8, SAM2, MedSAM-2, and regression/NLP models to deliver accurate and efficient AI solutions

Certura – Remote – Islamabad, Pakistan

MACHINE LEARNING ENGINEER INTERN (APR '25 – JUN '25)

Built and optimized supervised learning models including Linear Regression, Naive Bayes, and Random Forest. Implemented full ML pipelines from data preprocessing to model evaluation

Data Nomad –Islamabad, Pakistan

QA TEAM MANAGER / DATA LABELING QA (JUL '24 – DEC '24)

Promoted to QA Team Manager within 2 months. Audited and optimized labeled datasets (video, image, audio, OCR), improving annotation quality and AI training efficiency

Data Nomad –Islamabad, Pakistan

DATA LABELING SPECIALIST (FEB '24 – JUL '24)

Annotated large datasets for AI/ML projects using Label Studio, CVAT, and custom platforms. Developed efficient labeling workflows, ensuring dataset consistency and accuracy for computer vision and NLP models

Freelance – Pakistan

SHOPIFY & WORDPRESS DEVELOPER (FEB '16 – PRESENT)

Designed and optimized websites with a focus on performance, aesthetics, and SEO. Managed product listings, plugins, and client support to ensure responsive, user-friendly experience

Freelance – Pakistan

PC BUILDER (GAMING & PRODUCTIVITY) (JUN '16 – PRESENT)

Annotated large datasets for AI/ML projects using Label Studio, CVAT, and custom platforms. Developed efficient labeling workflows, ensuring dataset consistency and accuracy for computer vision and NLP models

ABOUT ME

A passionate **Software & Machine Learning Professional** with hands-on experience in AI/ML model development, data labeling, software solutions, and custom PC building. Skilled in building real-world applications including medical image segmentation, object detection, NLP classifiers, and predictive analytics.

Currently **entering the professional market full-time** after completing my Software Engineering degree, I am eager to apply my technical skills and problem-solving abilities to impactful projects.

My love for technology began in **2016 when I built my first PC**, and since then I have assembled high-performance systems for clients and companies.

An avid learner and tech enthusiast, I combine technical expertise with creativity, prod, teamwork, and a love for Pc Building, sports, fitness, and video editing.

Key Achievements:

- Developed multiple ML and DL projects including spam email detection (NLP), tumor detection (YOLO & SAM2), house price prediction (regression), and construction safety gear detection (YOLO), demonstrating expertise in AI/ML applications
- Promoted to QA Team Manager at Data Nomad within 2 months, reflecting strong leadership, attention to detail, and mastery of data labeling workflows
- Built and delivered **10** high-performance custom PCs for a company (Motion Spectrum) and multiple clients in one month, optimizing for gaming and productivity.

ROLES & RESPONSIBILITIES

Motion Spectrum – Hybrid – Lahore, Pakistan
JAN '25 – Present

System Administrator

- Administer and support **Windows Server and Windows 10/11** environments, ensuring system stability, security, and performance
- Build, configure, and deploy **custom desktops and workstations**, including hardware selection, BIOS/UEFI setup, and OS installation
- Manage **Active Directory (AD)** users, groups, OUs, and **Group Policy Objects (GPOs)** for access control and security enforcement
- Configure and maintain **file servers, shared drives, NTFS permissions**, and monitor **LAN/WAN, DHCP, DNS** infrastructure
- Implement **security, backup, patch management, troubleshooting, and performance optimization** to minimize downtime

Arch Technologies – Remote – Islamabad, Pakistan
JUN '25 – SEP '25

Machine Learning Engineer Intern

- Developed and evaluated ML models for real-world use cases including spam detection, tumor segmentation, and house price prediction
- Applied YOLO, SAM2, and MedSAM-2 for medical and object detection task
- Built regression and NLP models using scikit-learn, TF-IDF, and Naive Baye
- Implemented real-time PPE tracking with YOLOv11 **+** StrongSORT
- Utilized TensorFlow, PyTorch, OpenCV, Pandas, and Matplotlib for data analysis and visualization

Certura – Remote – Islamabad, Pakistan
APR '25 – JUN '25

Machine Learning Intern

- Built and optimized machine learning models including Linear Regression, Naive Bayes, and Random Forest
- Implemented data preprocessing pipelines (cleaning, feature scaling, vectorization) to prepare datasets for models
- Evaluated models using performance metrics such as RMSE and accuracy, and visualized feature importance
- Gained hands-on experience in supervised learning, feature engineering, and interpreting model performance for real-world datasets

Data Nomad – Remote – Islamabad, Pakistan
JUL '24 – DEC '24

Data Labeling QA

- Audited labeled datasets (video, image, audio, OCR) for accuracy, consistency, and adherence to annotation standard
- Detected and corrected labeling errors to improve AI model training quality and data integrity
- Provided detailed feedback and training support to labeling teams to enhance annotation precision
- Coordinated with project managers to implement quality control measures and optimize review workflow
- Monitored annotation metrics and reported quality performance for continuous improvement

Data Nomad – Remote – Islamabad, Pakistan
FEB '24 – JUL '24

Data Labeling Specialist

- Annotated video, image, audio, and OCR for AI/ML training using tools like Label Studio, CVAT, and custom platforms
- Followed strict annotation guidelines to ensure dataset accuracy and consistency
- Assisted in preparing and organizing large datasets for computer vision and NLP projects
- Collaborated with QA teams to identify labeling errors and improve annotation standards
- Contributed to developing efficient labeling workflows to boost productivity and model performance

Freelance – Pakistan
FEB '16 – Present

Shopify & WordPress Developer & Virtual Assistant

- Developed and customized Shopify and WordPress websites with a focus on performance and aesthetics
- Managed product listings, store updates, SEO optimization, and third-party app/plugin integration
- Ensured responsive, mobile-friendly designs
- Handled virtual assistant tasks including customer support, order processing, and admin operation
- Collaborated with clients to improve store functionality, design consistency, and user experience

Freelance – Pakistan **JUN '16 – Present**

PC Builder (Gaming & Productivity)

- Assembled and tailored high-performance gaming and productivity desktops, maximizing performance through optimal component selection, advanced cooling, and overclocking
- Offered post-build services and resolved hardware/software issues
- Built 8 new PCs for Motion Spectrum

EDUCATION CREDENTIALS:

Degree	University	Year
Bachelor of Science in Software Engineering	The Islamia University of Bahawalpur	2026

ADDITIONAL COMPETENCIES

Trainings /Conferences Attended:

- Deep Learning with PyTorch – Kaggle
- Introduction to TensorFlow for AI, ML & DL – Coursera
- Computer Vision Applications – OpenCV University
- Data Labeling & Annotation Standards – AWS / CVAT / Label Studio

Extracurricular Activities:

- A gym-loving individual who spends considerable time in the gym.
- A creative individual with a passion for video editing and visual storytelling.
- A computer builder with expertise in designing and assembling custom systems for friends and companies.

PERSONAL PROFILE

- Date of Birth: 11/07/2003
- Nationality: Pakistani
- Country of Residence: Bahawalpur, Pakistan
- Marital Status: Single
